

## YOUR VOICE & HOW TO USE IT

**BREATH** gives power so breathe deeply.

**VOCAL CORDS** produce a little note through **VIBRATION**.

**AMPLIFICATION** takes place in the chambers of the head:

PHARYNGEAL (Throat)  
ORAL (Mouth)  
NASAL (Nose)  
SINUSES  
SMALL CELLS and AIR POCKETS  
This gives **RESONANCE**

**SPEECH** is produced in the **MOUTH** using:

TONGUE  
TEETH  
LIPS  
HARD PALATE  
SOFT PALATE

There are 2 groups of sounds:

**VOWELS** – smooth, musical  
formed by lips and tongue only.  
**PRODUCE ACCENT.**

**CONSONANTS** – sharp, fricative  
Formed by any combination of the speech organs.  
**PRODUCE CLARITY.**

6 sounds are particularly important:

P & B  
T & D  
K & G

**JAW** should be relaxed and open to release sound.

Projection needs **MENTAL** and **PHYSICAL** application.
